- A user can configure the time period which a discovered device is shown as "New".

Migration Update:

- SyncThru6 supports migration from old SyncThru6 version to new SyncThru6 version.
-. For detail information about migration, please see the migration guide.

SNMP Agent:

- SNMPv3 supported.

Accounting:

- Changing the default Job record ordering in Job record list to time descending.
- Providing a notification message, some devices will be rebooted when Accounting is enabled.

Dashboard

- Accounting Status Widget added.

Device Configuration

- ID Only supported
-. A user can login on a device without a password.

Device Details

- A user can check operation history related to Accounting in "Accounting" tab.

Fixed Defects

Installer:

- “PostgreSQL Database” isn’t retained when SyncThru6 is installed again.
- “PostgreSQL Database” is not deleted when SyncThru6 upgraded with MSSQL DB.
- Database existence is not checked in one installation step.

Device Group:

- A group in Dynamic group remains even though all devices included in the dynamic group are deleted.

History:

- The installation results in not being displayed in Driver history, SNMP history and Site Manager Page.

Session Management:

- “Duplicate session detected error” happens if a user clicks on any option after 1 hour SyncThru6 idle time.

Driver:

- “All” option is missed.
- Driver files are uploaded even if it is greater than the maximum file size limit set in settings.

Report:

- Device Usage/SLA/Device - Ascending/Descending is displayed but the list not sorted.
- French translation for 'Today' in Report/Analysis is not displayed correctly.
- “Detail Usage” in Analysis isn’t shown properly.

Settings:

- Five characters in top domain aren’t allowed.
- SMTP server can’t be configured with anonymous if the SMTP server is located in the same machine with SyncThru6.
- “B4” and “Large” aren’t in “Large type” as a default.
- “HTTPs proxy” isn’t translated in French.

SNMP Agent:

- “Total count” is always same.

Accounting:

- Usage count isn’t changed in “Modify User window” in case of using LDAP server.
- A user can login in device panel after deleting the user in Accounting.

Known Issues

This list covers some of the known problems with SyncThru6. Please read this before reporting any new bugs.

All Systems

- “Accounting plug-in 1.0.1.0.1206071759” doesn’t work over SyncThru 6.0.1.301.
- After migration, Role Assignment column in User Management couldn’t be displayed by default because of Browser cache.
- “CLX-8650” Device is going to disconnected state when only SNMP V3 is enabled.
- In Rule, {User.roles} in email template can be blank in an email.
